

I would like to register my opposition to Docket 02-278 dealing with Rules and Regulations Implementing the Telephone Consumer Protection Act of 1991. I strongly request that you decide to stay the rule and reconsider your proposal in light of the burden on business. The scope of this act is far too broad and will not accomplish the intended result, it will simply create a burden for business and impede the free flow of information within my franchise organization. Thank you for your consideration.
